Full rights to work in Australia

PROFILE:

As a **Front-End Developer**, I have been working on multiple projects within both the public and the private sectors. Responsible for the creation and codification of innovative design and websites layouts, using concepts of UI/UX all the way to completion, fashioning everything from the home page to site layout and function, writing well designed, testable, efficient code by using best development practices.

KEY STRENGTHS:

Front-End Specialist – Developing many web systems for big companies, utilizing UI and UX concepts made me have the feeling of how to deliver the best layout skin with the best usability.

Web Developer – Having worked on many diverse projects has given me the ability to stay focused on the best development solution based on the business needs.

Agile – Implementing agile enabled me to take control of projects that lost focus and it also helped the team get more involved boosting team moral and reducing scope creep.

Problem Solving – Cleared blockages with vendors, and business stakeholders to provide alternative solutions and confronted issues, met timeframes, and minimise project risks.

SKILLS OFFERED:

Experience working within development tools. Wireframes and page mock-ups for user interface specifications. Proficient in **HTML5, CSS3, JavaScript, Responsive Design, Bootstrap, ReactJS, NodeJS, MERN, AWS, SQL Server, MySQL, Business Intelligence and Scrum/Agile.**

PROFESSIONAL EXPERIENCE:
